

AKHIL VENKATESH

Solution Architect | FullStack Developer

akhiltechwiz@gmail.com | [LinkedIn](#) | Singapore

PROFESSIONAL SUMMARY

Solutions architect and application developer with 7 years of experience building business systems end to end — from requirements scoping through architecture, implementation, and production support. Delivered 10+ full applications across diverse domains: procurement, employee onboarding, inventory management, security workforce deployment, corporate approval workflows, oil & gas process management, and IoT device administration — plus payment reconciliation and document processing integrations via REST APIs. Currently building LLM-powered systems (Claude API, Python/FastAPI, structured extraction) alongside full-stack TypeScript work. Targeting Forward Deployed Engineer / Implementation Engineer/Fullstack Developer roles in Singapore.

TECHNICAL SKILLS

Programming Languages: HTML, CSS, JavaScript, Typescript, Python, PostGreSQL, Deluge

Frameworks: NextJS, FastAPI, Hono

DevOps: Docker, Github Actions, Terraform

Cloud Providers: Hetzner, AWS, Railway, Fly.io

PROFESSIONAL EXPERIENCE (7+ YEARS)

Zoho Developer | Dec 2025 - present

Heylo Housing | Remote

- Designed, developed, and deployed customized applications using **Zoho Creator**, ensuring **{{ scalability and user-centric design }}**.
- Architected Cross-Organizational Data Synchronization:** Developed automated scripts within Zoho Books to facilitate real-time vendor replication across multiple entities, ensuring **{{ data consistency and eliminated manual entry redundancies }}**.
- Led End-to-End Data Migration & ETL:** Orchestrated the extraction, cleansing, and mapping of complex legacy financial data into Zoho Books, achieving **{{ seamless system transitions with 100% data integrity }}**.
- Engineered Strategic Third-Party Integrations:** Designed a robust data pipeline connecting Zoho Analytics and Zoho Creator to FloQast, resulting in **{{ automated financial closing cycles and enhanced reporting transparency }}**.
- Full-Stack Ecosystem Development:** Delivered high-impact business modules and custom workflows using Deluge, focusing on **{{ process optimization and the digitization of manual business operations }}**.

Senior App Developer | Apr 2022 - Jul 2025

Zoho Corporation | Chennai

- Designed, developed, and deployed customized applications using **Zoho Creator**, ensuring **{{ scalability and user-centric design }}**.
- Delivered end-to-end application lifecycle management, meeting specific business requirements and driving sustained **business value**.
- Leveraged **Figma**, **React.js**, and modern web technologies to create **visually appealing, responsive applications**, ensuring cross-device compatibility.
- Enhanced application functionality through **Deluge scripting**, implementing **{{ custom logic to optimize performance }}**.
- Mentored and provided technical guidance to junior developers, driving skill development, code quality, and adherence to established project standards.
- Proactively identified, analyzed, and mitigated development bottlenecks, ensuring timely delivery of milestones and critical deadlines.
- Collaborated closely with cross-functional teams and engineering leadership to resolve technical and non-technical challenges, maintaining smooth project execution and delivery momentum.

Technologies Used: Zoho Creator, Vite, [React.js](#), Typescript, shadcn, Tailwind, Figma, Deluge, Zoho Flow, Zoho Books, Zoho Inventory, Zoho CRM, Zoho Billings

Technical Support Engineer | Feb 2018 - Mar 2022

Zoho Corporation | Chennai

- Provided remote support for cloud-based solutions via phone, email, and chat, ensuring {{ timely resolution of client issues }}.
- Conducted product demos and webinars, increasing **customer engagement** and driving **sales growth**.

Technologies Used: Zoho Invoice, Zoho Subscriptions, Deluge

EDUCATION

B.Tech. in Computer Science | Jun 2014 - Jul 2018

Hindustan University | OMR, India
